--------------	----------

provideMeansAndPlotPerDosageGroup
Proof of Concept Function for an RSB XML Application

Description

Proof of Concept Function for an RSB XML Application

Usage

```
provideMeansAndPlotPerDosageGroup(plotColor, nrOfDimensions, doc)
```

Arguments

plotColor	color for the plot symbols (character of length one)
nrOfDimensions	dummy variable (character of length one)
doc	XML document as handled by RSBXmlService

Value

character vector of length one representing the output XML string

Author(s)

Tobias Verbeke

RSBXmlService

Generic Function to Handle R Requests from RSB XML Applications

Description

The function extracts relevant information from the statHeader element to dispatch to the appropriate R wrapper for that particular application

Usage

```
RSBXmlService(xmlString)
```

Arguments

`xmlString` character vector of length one containing the XML string

Value

character vector of length one representing the output XML string

Author(s)

Tobias Verbeke
